System Requirements for PCI-Express Frame Grabber

Important installation notes

- The PCI-Express Frame Grabber is only compatible with desktops that have an available full height PCI express slot. Dell systems are not compatible with the frame grabber.
- Install all necessary drivers in a standalone system without internet connection or connection to any server.
- Installation should be with full administration privileges.
- Disable the antivirus system temporary during the installation.
- Install and use the driver version 10.3.0.
